Marketing

Catalogue Description: Hair has been planted with realist and natural hair growth. Labor Pro training heads have become known over the years for their quality and their high guaranteed results. Something now confirmed by almost all of the world's trichological companies, as well as academies and training centres. The quality is guaranteed by the high density of hair per square centimetre (45 implants per square centimetre!), certified hygiene, and the hair being hand-implanted one by one along the natural lines of hair growth. Labor Pro training heads are characterized by soft hair and suitable for every type of treatment, from cutting to styling, from dyeing (also naturally based) to perms.
