ZEPHYR PROFESSIONAL HIGH SPEED HAIR DRYER

Marketing

Catalogue Description: Top speed and technology for maximum performances. The digital Brushless motor rotates at high speed (110,000 rpm) and is designed for a long working life (over 2,500 hours). The quietest hair dryer in its class, it is only 75 db and does not make any harsh hissing noises. With the powerful airflow of the Zephyr, drying times are reduced when compared to conventional hair dryers, while the Extra-ion Shine technology gives hair an unrivalled shine. The LED status lights allow immediate control of the settings (up to 12 possible configurations), and it is possible to recall the most recently sed settings thanks to the Memory function. Air extraction is achieved by means of a double protective filter: a sponge anti-dust pre-filter and a micro-perforated steel filter. By enabling the self-cleaning function, the motor rotates in the opposite direction allowing deeper and more thorough cleaning.
